

BROKERAGE FOR HEALTH

September 3-4 2018, Oslo

TELEMEDICINE

Marek Soltys

Redcap solutions s.r.o.

SME, Czech republic

HEALTH-NCP-NET 2.0 project is funded by the European Commission

Challenge

Challenge

Lack of medical staff and high unmet medical needs.

Redcap Solutions

We virtually breaks the walls and connecting professionals on demand and supply side, live, deleting the distance between them.

We build the systems based on real time videoexchange, triggering the uptake of telecollaboration **in future 4K and 8K formats**

Shortage of
10 million
medical staff
by 2030

35 million
Europeans
with unmet
medical
needs

Topic

IP MEDICAL GATEWAY

- Telemedicine and remote surgery
- Computer assisted robotic surgery
- Endoscopy, laparoscopy
- Assisted medicine
- Simulated learning
- Live streaming and Image recognition

Medical experts sharing worldwide

Accelerated time to operation

Costs reductions – transport elimination, idle
time and hospital stay reduction

Economy development – access to an
untapped talent from rural and distant areas

Conclusion

Real time telecollaboration immediately pulls talent from anywhere without physical relocation

Such a virtualization is honored by doctors for immediate remote diagnosis, assisted treatments and knowledge sharing

„ The precise, live information is the key to the right decision making „

save
lives

reduce injury
consequences

accelerate
training
