session (edit)

Targeted Health Outcome Measurement

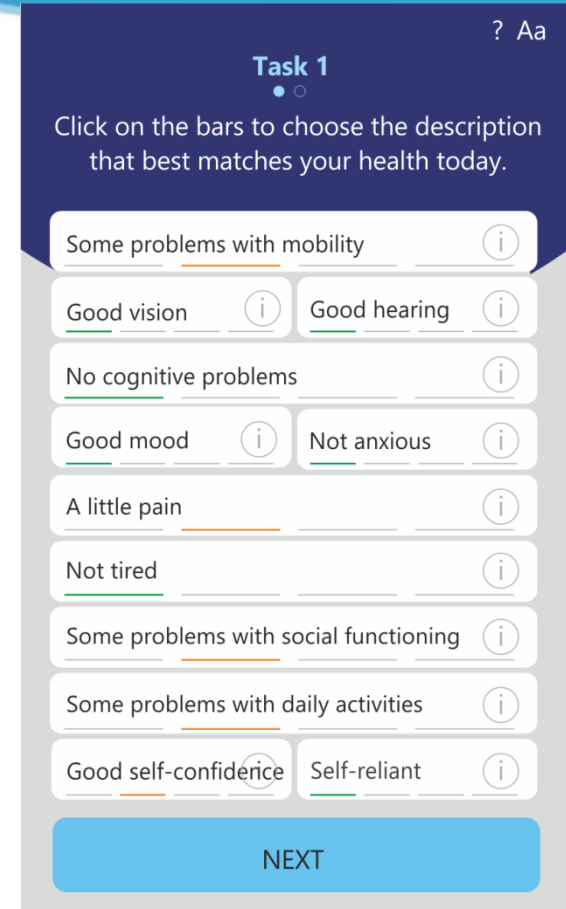

Paul F.M. Krabbe

University Medical Center Groningen
The Netherlands

HEALTH-NCP-NET 2.0 project is funded by the European Commission

Expertise

- Patients determine the content of the health outcome instruments, patients assess their own health status.
- Easy and attractive by using intuitive apps.

Task 1

Click on the bars to choose the description that best matches your health today.

Some problems with mobility

Good vision Good hearing

No cognitive problems

Good mood Not anxious

A little pain

Not tired
