

BROKERAGE FOR HEALTH

September 3-4 2018, Oslo

session (edit)

Prevent4Work

Dr. Pablo Herrero, PT, PhD

San Jorge University, Spain

Project idea/ Company expertise

- **Prevention and Self-Management of Musculoskeletal Pain through technology**
- **1st European Project:** platform developed to prescribe exercises to patients and monitor their evolution remotely (finished August 2018) www.hefora.com
- **2nd European Project:** implementation of technology (big data and AI) to promote prevention of Musculoskeletal Pain and promotion of healthy ageing and wellbeing (starting November '18 until 2021). Prevent4Work

Topic

Prevention and Self-management of Musculoskeletal Pain through technology

OBJECTIVES

To continue developing new services compatible with the previous projects to improve people's quality of life

Physiotherapy, Rehabilitation, Musculoskeletal Pain, Rehabilitation Technologies, Big Data, Artificial Intelligence, Machine Learning

Looking for new projects and partners

We are a Research Group (iPhysio) with experience to transfer new products and services to the health and wellbeing sector.

We look for partners in the technology sector that can work with us to develop new products and services and make them available to society with the aim to improve its quality of life.
