

# BROKERAGE FOR HEALTH

## September 3-4 2018, Oslo

Pilot on Smart and Healthy Living at Home  
Pilot on Integrated Care

Marije Blok – Projectmanager Innovation  
*National Foundation for the Elderly*  
*(the Netherlands)*

# National Foundation for the Elderly

## Who we are:

- The National Foundation for the Elderly is a Dutch (non-governmental) charity;
- Focus on older vulnerable people, combatting loneliness;
- Wellbeing services for older people living at home (dinners, events, befriending programmes, phone helpline, sports activities);
- Research on social inclusion and independent living with use of technology;
- Experience in interdisciplinary and international innovation projects, representing the older individual as end-user;
- Pilot trials with older people living at home to verify effects and impact on quality of life of interventions.

# Topic

We are interested in participating in the following calls:

- SC1-DTH-AA-2019 Large Scale pilots of personalised & outcome based integrated care Together with a large (Dutch) home care organization, focusing on integrated care, we'd like to validate how to support the chain of care; prevent hospitalization **and reinforce the composition of local informal and formal care support for older people.**

- DT-TDS-01-2019: Smart and healthy living at home

Together with a city council/housing organization, investigating smart and healthy living at home, **focusing on innovative solutions in the domain of transport/mobility**, determining how intelligent and personalised technology supports independence and healthy living of older people and their mobility.

# Our role in new projects

## Our role in the project:

- Involving older people (living independently at home) in a pilot trial;
- Defining/mapping in collaboration with our Dutch partner the care processes that can be supported by smart solutions;
- Defining the requirements/customization of technology necessary for the Dutch pilot.
- Defining/implementing research methodology to define impact on quality of life and efficiency gains in care and well-being.
