Warsaw, Poland

Project idea/ Company expertise

INNOWO is a non-governmental organization, **THINK to DO TANK** established to support the development of innovation and implementation of systemic changes for the purpose of sustainable socio-economic progress.

Expertize:

Healthcare

We support the implementation of technological and systemic innovations in health care. To this end, we identify promising industry development paths, as well as barriers resulting in reduced system efficiency and adverse effects for the patients. Our analyses, based primarily on economic tools, confirm the importance of effective medical expenses as an investment resulting in health, economic and social situation improvement of Poles.

Topic

- SC1-HCO-01-2018-2018-2020 Personalized medicine. Actions in support of the International Consortium for Personalized Medicine
- SC1-BHC-25-2019 Innovative care and health systems. Demonstration pilots for implementation of personalized medicine in healthcare
- SC1-DTH-01-2019 Big data and artificial intelligence for monitoring health status and quality of life after cancer treatment
- SC1-DTH-05-2019 Large scale implementation of digital innovation for care and health in ageing society
- SC1-DTH-11-2019 Large scale pilots of personalized & outcome based integrated care

Economic reports and analyses (i.a. indirect costs of diseases, economic efficiency)

Analysis of costs and economic impact of selected phenomena, innovations and systemic changes

Analysis of total costs of disease, which are carried out in close cooperation with experts from the National Health Fund and the Social Insurance Institution.

Regulatory impact studies)

Analysis the economic and social effects of the implemented regulations and legislative solutions based on research and social consultations among interested stakeholder groups. By conducting comprehensive analysis and collecting opinions and suggestions, we develop recommendations and guidelines for decision-makers.

Process modelling

The process modelling aims at examining the course of events and relationships between various groups of stakeholders in order to improve the efficiency of the analysed practice.

Multistakeholder involvement

At INNOWO we connect all participants of the ecosystem - those who make the decision, those responsible for its implementation and those whom it directly affects.

Understanding the different perspectives and interests will allow for effective implementation of new strategies.

As part of building an experience exchange platform, we organize debates, workshops and round tables that combine knowledge and various expert opinions to develop and implement effective solutions.
