Seeking partnerships
Julia Muraszkwicz
Trilateral Research Ltd.

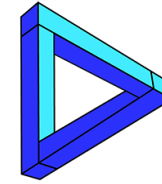

Trilateral Research Ltd

- **ABOUT:** Trilateral Research Ltd, founded in 2004, **transforms research into innovation and impact.** Our teams collaborate across social sciences and technology development, deriving insights that support data driven ethical innovation.
- **SERVICES:** Research, policy assessment and recommendations, impact assessment (gender, socio-cultural, privacy, ethics), technology development, data science and dissemination.
- **STAFF:** 34 full-time staff; 72% PhD level; dissemination and exploitation department
- **Experience:** 40 EU projects and over 22 global tenders; over 10 active H2020 projects; led the dissemination for 12 large projects

Topic

TRILATERAL
RESEARCH

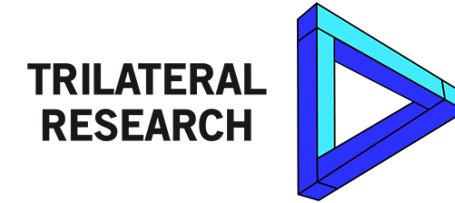

- **DT-MIGRATION-06-2018-2019:** Addressing the challenge of migrant integration through ICT-enabled solutions.
 - ❖ A near complete consortium and 80% written proposal
 - ❖ A 50-50 balance between social science research and technology development
 - ❖ A re-submission of a project that aims to help local authorities in EU to become better equipped with data to achieve the goal of sustainable migrant integration
- **GOVERNANCE-01-2019:** Trust in governance
 - ❖ Foundational research will pioneer a neuroscience-in-the-wild approach to study trust and its evolution over time in various political contexts
 - ❖ Consortium started
- **DT-TRANSFORMATIONS-07-2019:** The impact of technological transformations on children and youth
 - ❖ TRI is interested in joining/building a consortium for this call and can offer any of its services which include:
 - ❖ Strong support for the proposal writing process – extensive experience of H2020
 - ❖ Expertise in social science and co-design methodologies – examining the societal impact of new technologies
 - ❖ Expertise in terrorism and radicalisation

To discuss collaboration opportunities, contact Su Anson: susan.anson@trilateralresearch.com
- **Others**
 - ❖ Keen to join consortia and bring experience in: (i) research; (ii) risk assessment methodologies; (iii) impact assessment [privacy, socio-cultural, **gender**]; (iv) data science, machine learning, data processing; (v) dissemination
